

Dear Commisioners:

Please reject NAB's petition 04-160. I love XM sattelite radio. This is a brilliant medium that brings information to many poeple that struggle to get other broadcast information while traveling or in remote areas. The same arguments against XM by our broadcast media were made against that motorized carriage by horse ranchers and the blacksmith lobby in the beginning of this century! Do not let this lobby destroy the advancement of speach to protect their financial interests. I, as a consumer should have the right to decide what I want to pay for and listen to. Please work to protect my rights!

Thank You For Your Time,

Scott Potter
